

1.1b: CISCO VPN blocker... ..

[Michael Renner](#) 23 posts since

Sep 27, 2006 ...if Fusion is running the CISCO client isn't launching anymore.

workaround:

Suspend Fusion (takes very long now)

stop Fusion services (sudo /Library/Application\ Support/VMware\ Fusion/boot.sh --stop)

launch CISCO

start Fusion services (sudo /Library/Application\ Support/VMware\ Fusion/boot.sh --start)

launch Fusion

open VM again

Finally someone else that is having this problem in 1.1 !!

I am seeing this as well with 1.1 final!
