

# VMware Player Error Opening a Virtual ...

---

martyfelker 178 posts since

Sep 30, 2005

VM created using Windows WS 6.02 host Windows 2008 Server (eval) - 64 -bit using Player 2.02 installed on Ubuntu 7.10

VMware Player seems to installed correctly (for example got accept screen)v

Error message.

VMware Player unrecoverable error: (vcpu-0)

Failed to allocate page for guest RAM!

A log file is available in "/media/sdb5/Documents and Settings/marty/My Documents/My Virtual Machines/Foresight/vmware.log". A core file is available in "/media/sdb5/Documents and Settings/marty/My Documents/My Virtual Machines/Foresight/core". Please request support and include the contents of the log file and core file.

Core file? Don't see such a file using Ubuntu NTFS-3g.

I'd really like to open a VM I've created.

Any help/ideas would be greatly appreciated.

I won't start another thread (don't know if that is proper or not so I'm replying to my own post)

Opening the same .vdmk (Foresight) using VirtualBox worked perfectly.

Should I use an earlier version of VMPlayer?? Why does VirtualBox work and VMware Player?

[utmark](#) 3 posts since

Feb 4, 2008 2. **Re: VMware Player Error Opening a Virtual Machine created by WS** Feb 4, 2008 10:20 PM

↑ in response to: [martyfelker](#) I'm having the exact same problem.

Dec 2, 2004 3. **Re: VMware Player Error Opening a Virtual Machine created by WS** Feb 5, 2008 12:42 AM

↑ in response to: [utmark](#) Which version of workstation was used?

Does the host machine have a page file?

Does it still do it if you add

```
mainMem.useNamedFile=FALSE
```

into the vmx file?

Feb 4, 2008 4. **Re: VMware Player Error Opening a Virtual Machine created by WS** Feb 5, 2008 11:24 AM

↑ in response to: [Liz](#) So i copied the vmx file to a local hard drive (was previously over a read/write samba share) and now it works...

VMware Player Error Opening a Virtual ...

**TTux** 1 posts since

Nov 3, 2008 5. **Re: VMware Player Error Opening a Virtual Machine created by WS** Nov 3, 2008 10:50 AM

 in response to: [Liz](#)

I was having the same problem. Adding the suggested line to the .vmx file fixed the problem (mainMem.useNamedFile="FALSE").

Thanks!
