

unable to install 64 bit windows on ...

[seaskyblue](#) 6 posts since

Jun 13, 2007 hi, friends!

I want to create a VM to install 64-bit Windows. When I power on the VM, I received the following error message:

Error

Host CPU is incompatible with the virtual machine's requirements at CPUID level 0x80000001 register 'edx'.

host bits: 0000:0000:0001:0000:0000:0000:0000:0000

required: xx1x:xxxx:xxxx:xxxx:xxxx:xxxx:xxxx:xxxx

Mismatch detected for these features:

* Longmode; required when a virtual machine is configured for a 64-bit guest OS.

my server:

Dell PE 2950, Intel Xeon E5310 x2, 16GB RAM

my storage:

Dell PV MD3000

ok, I fixed the error.

Open CPU option "VT" in the BIOS config.
