

Cannot open Remote Console with Firefox ...

Hello, my problem is that I have installed the VMWare Remote Console Plugin 2.5.0.100265 with Nightly Tester Tools on Firefox 3.0.1(OS Win XP SP3).

When I try to open a console, I always get the same error (see attached JPG). I also edit the hosts file in C:\WINDOWS\system32\drivers\etc to anticipate problems with the name resolution.

I had the same Errors with Firefox 3.0.0.

Can anybody help me? **Attachments:**
