

VMware Fusion 2.0 Release Candidate now

...

Pat Lee 1,192 posts since

Jan 3, 2007 I am happy to announce that VMware Fusion 2.0 Release Candidate (build 113392) is now available! VMware Fusion 2.0 will be a free downloadable upgrade for all VMware Fusion 1.x customers when released.

Click here to download VMware Fusion 2.0 Release Candidate (build 113392):
<http://www.vmware.com/communities/content/beta/fusion20/registration.html>

VMware Fusion 2.0 RC has many enhancements and fixes, including:

- Windows Virus Protection Included with a 12-month complementary subscription to McAfee VirusScan Plus for XP and Vista
- Now Available in Seven Languages: English, French, German, Japanese, Simplified Chinese, and now Spanish and Italian
- User Interface Improvements in Snapshot/Rollback window and Sharing settings pane
- Mac OS X Server Guest Improvements
- Shared Applications/URL Handling Improvements
- Revamped Help
- Reduced Download Size

For more details and a list of key bugs fixed, see:

<http://communities.vmware.com/docs/DOC-7452>

We are excited to be in the home stretch and we look forward to your feedback.

NOTE: As with any pre-release release, there are known and unknown issues. We recommend testing only for those who want to use the latest and greatest software and can afford potential downtime and issues.

Smoothest upgrade yet. Upgraded the Tools in XP SP3, Vista SP1 x86 and x64, Ubuntu, OpenSUSE. Syncing my USB devices (Palm Centro, Blackberry, iPhone, Polar IR) working beautifully too.

Wow: vmrun has been greatly improved. If you're "Terminal"-ly-inclined you may never have to run the GUI. 😊

Great work team!
