

VMWare Infrastructure Power Documenter ...

[tzamora](#) 3 posts since

Aug 28, 2008 hi people, for those of you who have already downloaded VMWare Infrastructure Power Documenter (<http://communities.vmware.com/docs/DOC-7473>) I'm very happy to announce that the issue reported at section "Know Issues" at readme file has been solved. I'm attaching the fixed Power Documenter version to this message. For those of you who have not downloaded the Power Documenter this is the latest version so I invited you to download it and start using it. I'm pretty sure it can be of help for many of you

VMware Power Documenter is a PowerShell script that uses the VMware Infrastructure Toolkit and [Open Xml Power Tools](#) to create reports in Open Xml formats for VMware infrastructure.

UPDATE: I have now corrected some fixes :P **Attachments:**

- [VMwareInfrastructurePowerDocumenter 1.0.1.zip](#) (365.2 K)

VERY cool!!!! Thanks. I am just figuring out PS and the VI toolkit. This is very nice. Thanks

Dave
