

Communities unavailable from Belgium ? ...

[LucD](#) 2,430 posts since

Oct 31, 2005 Anyone else having problems reaching the Communities from Belgium since a couple of days ?

The communities URL translates to **a1005.g.akamai.net** (195.130.135.206,195.130.135.212) over here.

The "origin" communities website can be reached without a problem.

No other websites seem to have a problem.

 in response to: [RDellimmagine](#) Oops, I had an entry in my hosts file pointing to another Akamai server.

Thanks to the hint from the network guru I discovered it finally by trying to reach another site hosted by Akamai.
