

invoke-vmscript timeout issue ...

[halr9000](#) 814 posts since

Jun 7, 2007 I just tried to do invoke-vmscript against a VM and I'm not sure that the default timeout of 20 seconds is working. Possibly related is the fact that I didn't realize that the tools service was out of date until I got warned so by the cmdlet.

Yeah, it's been sitting here a couple of minutes now, I don't think it's gonna work.
