

How to disable netbios-ns queries from ...

[jmhacsi](#) 1 posts since

May 12, 2009 I have a problem with VMware Fusion Version 2.0.4 (159196). The vmnet-natd is doing netbios-ns query (UDP/137 subnet broadcast) every 5 minutes. This generates spurious logs on the firewall. Can I disable somehow these netbios-ns queries? Tags: fusion2.0, networking, vmnet
