If think is not (directly) possible.

Maybe with SDK.

Andre

in response to: [AndreTheGiant](#) Hello,

Is this within the VM? The vCenter Server? or within the VIC? that you want to view things? Event Viewer means a few different things.

in response to: [Texiwill](#) Using Vmwaer Infrastructure client, i go to tasks & events. It only shows me 2 days worth of events. How can i be able to see 2 weeks worth of events.

thank you.

in response to: [sunvmman](#) Hello,

Unfortunately you can not. If you are using vCenter Server you can write some custom SQL Queries or use 3rd party products such as Reflex VMC.

vmware infrastructure VMI - events ...

If you do not have vCenter then you would need to parse the /var/log/vmware/hostd.log file.
