

Windows startup takes long time and ...

[clasher](#) 1 posts since

May 16, 2009 Macbook Unibody 2.0G, 2G Ram, WinXP Bootcamp, Fusion 2.0.4 running bootcamp partition.

Everytime when I use Fusion and startup my winxp as a guest, it will take forever to bootup and scandisk appears to perform a disk check. I wonder what's wrong and how to resolve the problem.

Anyone knows what is the problem? I tried searching the community but no luck. Thank you very much.
