

recovery data from broken raid 5 array ...

[mirla](#) 4 posts since

May 26, 2009 Where was esxi server 3.5 installed then my raid 5 array broke, and i rebuild them and dont format.. now my esxi server dont start.

it is possible to get virtual mashines from this partition?

But you have lost 2 (or more) disks in your RAID5?

Only in this way you have a broken RAID.

👤 in response to: [mirla](#) I have had great luck recovering RAID devices doing it myself using RAID Reconstructor from runtime.org The software copies the data from each disk to a single disk image putting all the pieces in the right order.
