

# VMware Player unrecoverable error: ...

---

AlainLavoie 2 posts since

Jun 22, 2009

Hi,

My OS (Windows server 2003) was rebooted, I don't know how.

Since then, everything restarted normally except my virtual machine running under vmware player.

I am getting the following error:

Error #1

VMware Player unrecoverable error: (player)

Exception 0xc0000005 (access violation) has occurred,

...

Error #2

The virtual machine is busy.

Details sequence of events:

- 1-The vm player starts normally.
- 2-I try to start a vm (a version of TwikiVMDebianStable, called VM#1)
- 3-I see the vm player trying to process a "Restoring State" sequence
- 4-I get the error #1
- 5-I click ok to the error dialog box
- 6-I try to close the vm player
- 7-I get the error #2
- 8-I can only stop the vm player by the Task Manager -> Applications -> End Task

Tests

- 1-I tested an old copy of the same VM (called VM#2). It started except for the network negotiation with the DHCP server.
- 2-I reinstalled the VM player.
- 3- I still have the same errors with the VM#1.
- 4-I searched in the VM ware communities for answers but could figured out how to maps present answers to my case.

I am out of ideas !

I Have the following configuration:

VMware Player unrecoverable error: ...

OS: Windows Server 2003

Machine: Dell Server

VM: TwikiVMDebianStable: Linux distribution.

Here is the content of my log file:

---

Since it seems that nobody can help me, is there an existing paying service somewhere to resolve my issue ?
