

Anyone have a compy of a ESX Visio ...

[theblackknight](#) 181 posts since

Aug 5, 2008

Hi,

I'm looking for some type of ESX \ VMware type Visio diagram template or example they can send me? Im looking for some type of Visio diagram that outlines ESX hosts-showing HA and DRS...ETC.

Maybe there is some site that might have an eaxmple?

here you have some icons and PPTs

<http://viops.vmware.com/home/docs/DOC-1338>

hope it is helpful for you

I do not have a drawn visio diagram but veeam does have a set of free Visio objects representing VMware objects - <http://www.veeam.com/vmware-esx-stencils.html>

If you find this or any other answer useful please consider awarding points by marking the answer correct or helpful

 in response to: [weinstein5](#)

some visio stencils:

<http://www.vmguru.com/index.php/component/attachments/download/1> (VMware stencils)

<http://www.visiocafe.com/> (general stencils)

 in response to: [theblackknight](#) I supposed your'e looking for a real world ESX 3.5 diagram and this can varies depends on the requirements, but if you understand the ESX 3.5 and design/architecture concepts than using Visio stencils provided and you can sit down and draw any networks/diagram you wish and its very straight forward. Here is a quick example of what components and ports communicate and use it toward your drawings. I have several ESX 3.5 & ESX 4.0 architecture diagram for my clients but that would be strictly confidential and wouldn't post it here. For more information, download ESX 4.0 guides online.
