Jun 5, 2008

Is the Orchestrator 4.0 available as a stand alone client installation? It seems to come bundled with vSphere and I don't readily see how to install it separately.

regards,

~Patrick

Hallo Patrick

You can install the client from the DVD (VMware-VIMSetup-all-4.0.0-162902.is) or VMware-VIMSetup-all-4.0.0-162902.zip listing \vpx\vmo\VCenterOrchestrator.exe
