

Update 1 Rollup for Windows 200 SP4 ...

[s1m0nb](#) 205 posts since

Apr 5, 2004 Hi

I see there is a requirement for this prior to the VC2 to VC2.0.1 upgrade. I have applied the patch - but still get the complaint that setup cannot continue...any ideas??

Oh and i am also getting an IE script error on autorun...

Line: 1001

Char 10

A DLL initialization routine failed

Code 0

URL: file://E:\autorun\autorun.htm

Never mind - its got fixed with an SR - the answer for anyone interested is:

#I had to log an SR with VMware, and they have confirmed this is a bug in the installer caused by incorrect lookup of Update Rollup 1 in the registry. Reg hack is available but will be fixed in VC 2.02.#

I also handed over this issue to one of the escalation engineers at VMware in Ireland.

Here a short summary:

***** Problem *****

Update from VC 2.0.0 to VC 2.0.1 not possible.

Error message that #Update Rollup 1# is not installed.

***** Root Cause (if known) *****

Wrong registry check of installer.

***** Solution *****

Replace NTDLL.DLL by KERNEL32.DLL:

HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Updates\Windows 2000\SP5\Update Rollup 1\Filelist\0]

Update 1 Rollup for Windows 200 SP4 ...

"FileName"="NTDLL.DLL"

"Version"="5.0.2195.7006"

"BuildDate"="Thu Jan 13 10:09:36 2005"

"BuildChecksum"="77ecb"

"Location"="C:\\WINNT

system32"
