Plataforma de Aplicaciones Cloud

Posibilita a los desarrolladores implementar y ejecutar aplicaciones cloud modernas que tienen la capacidad de coordinarse con la infraestructura subyacente para maximizar el rendimiento de la aplicaciones, la calidad de servicio y la utilización de recursos.

Requisitos de las Nuevas Apps

- ✓ Fácil de Usar
- ✓ Colaborativas
- ✓ Riqueza de Información
- ✓ Accedidas anywhere
- ✓ Fácil de Desarrollar
- ✓ Rápidas de Desplegar
- ✓ Instantáneamente Escalables

Anunciamos vFabric: Plataforma de Apps Cloud de VMware

Las Nuevas Aplicaciones requieren Frameworks modernos y servicios de Plataforma Integrados para sacar partido a la

Infraestructura Cloud

End-User Computing:

Una aproximación a la informática personal centrada en el usuario que asegura el acceso seguro a las aplicaciones y los datos desde cualquier dispositivo, donde y cuando el usuario lo necesite.

The End User Computing Journey

**MODERNIZAR
EL DESKTOP**

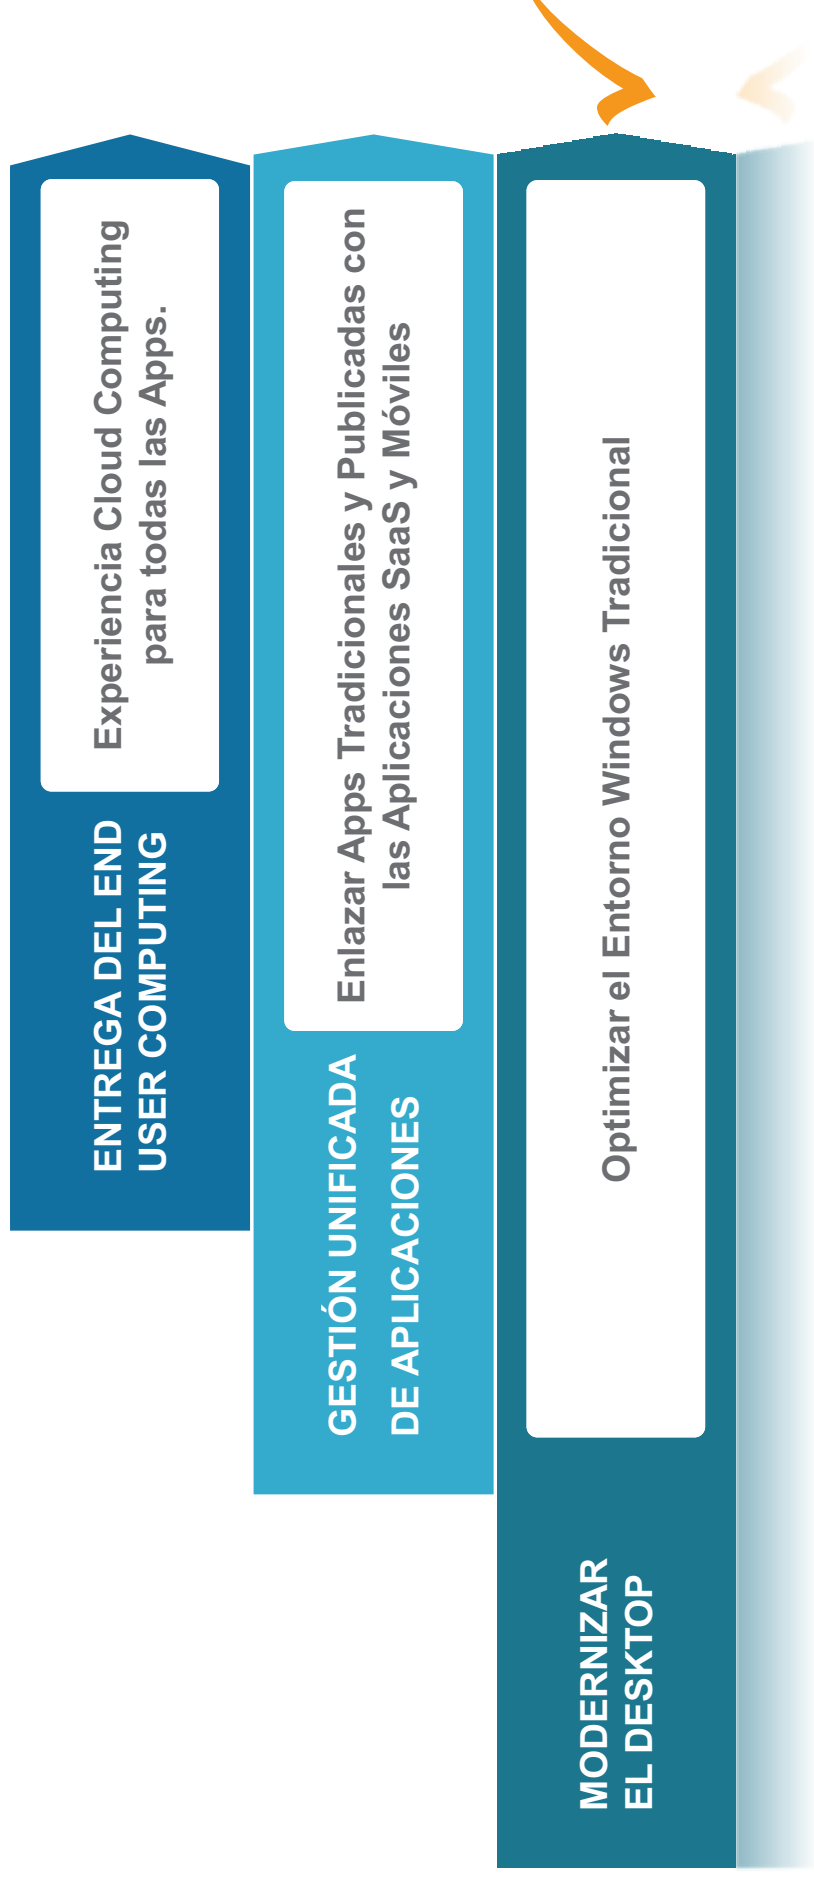

Optimizar el Entorno Windows Tradicional

Modernizar el Desktop

- ✓ Windows 7 support
- ✓ Offline support
- ✓ Mac support
- ✓ vSphere 4.1 scalability

The End User Computing Journey

**El Nuevo Stack
para
IT as a Service**

End User Computing
