

vCC

vCloud Connector

vmware®

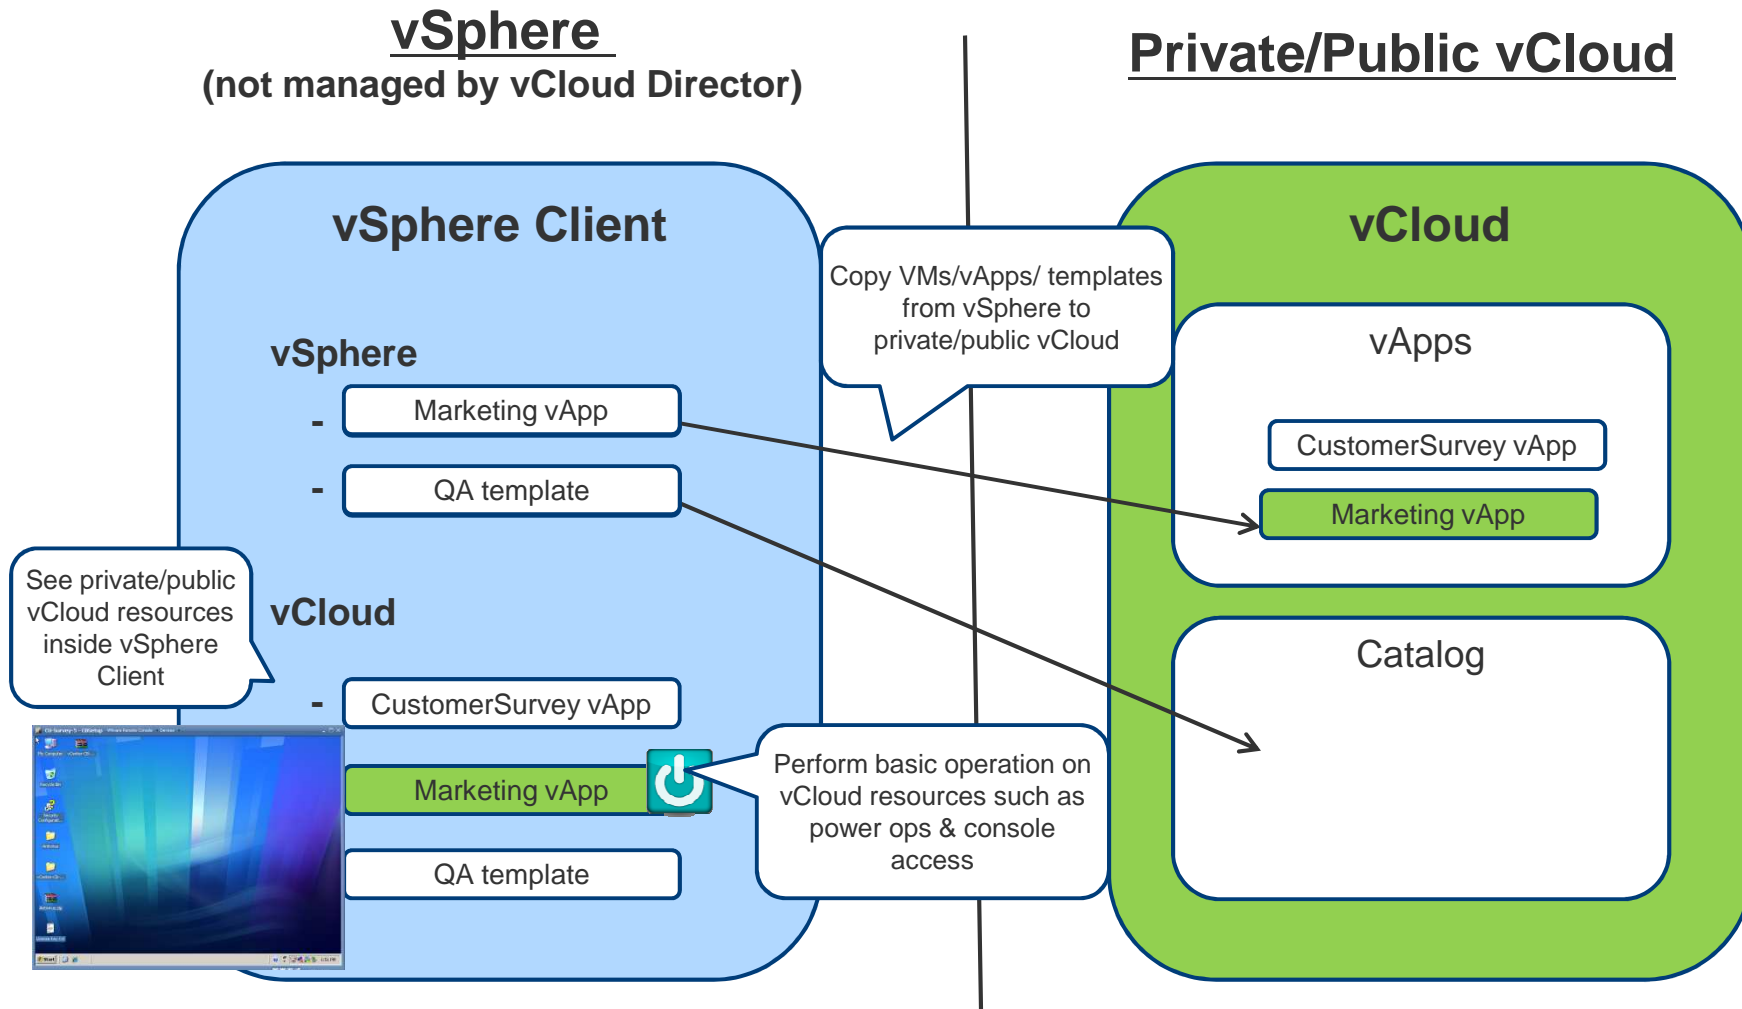

Overview

vCloud Connector (vCC) is a vSphere Client plugin that allows a user to use vSphere Client to:

- Visualize workloads & templates across vSphere & private/public vClouds
- Migrate workloads & templates between vSphere & vClouds
 - vSphere <-> vCloud
 - vSphere <-> vSphere
 - vCloud <-> vCloud
- Perform basic power & deployment ops on workloads & templates
- Access console (VMRC) of vApps in vClouds
- Launch vCloud Director or vCloud Datacenter Service Web UI directly
