- Security Profile
- System Resource Allocation
- Advanced Settings

**VMDirectPath Configuration**

**Warning:** Configuring host hardware without special virtualization features for virtual machine passthrough will make it unavailable for use except via dedicating it to a single virtual machine. In particular, configuring a device needed for normal host boot or operation can make normal host boot impossible and may require significant effort to undo. See the online help for more information.

Each listed device is available for direct access by the virtual machines on this host.
