

PSC after reboot

The screenshot displays the VMware vCenter Server Appliance Summary page. The interface includes a top navigation bar with the VMware logo and 'vCenter Server Appliance' title, and a 'Logout' link. A left-hand 'Navigator' pane lists various management sections: Summary, Access, Networking, Time, Update, Administration, Syslog Configuration, and CPU and Memory. The main content area is titled 'Summary' and features a server icon, a 'Hostname' field with a redacted value, and buttons for 'Backup', 'Create Support Bundle', 'Reboot', and 'Shut Down'. Below this, the 'Health Status' section is circled in red and contains a table with the following data:

Health Status	
Overall Health	Good
Last Health Check	2021/08/20, 07:44:59
CPU	Good
Memory	Good

Below the health status is a 'Health Messages' section with the text 'No Messages Available.' To the right, the 'Single Sign-On' section contains a table with the following data:

Single Sign-On	
Single Sign-On Domain	vsphere.local
Status	Running
