

1. I connect my mobile to my laptop and change mode to PTP

Explorer:

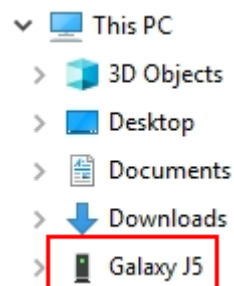

Device Manager:

2. Connect to Windows Server 2019 Desktop with Horizon Client (Windows 10)

Explorer:

Device Manager:

- Portable Devices
 - Data
 - dataK
 - Galaxy J5

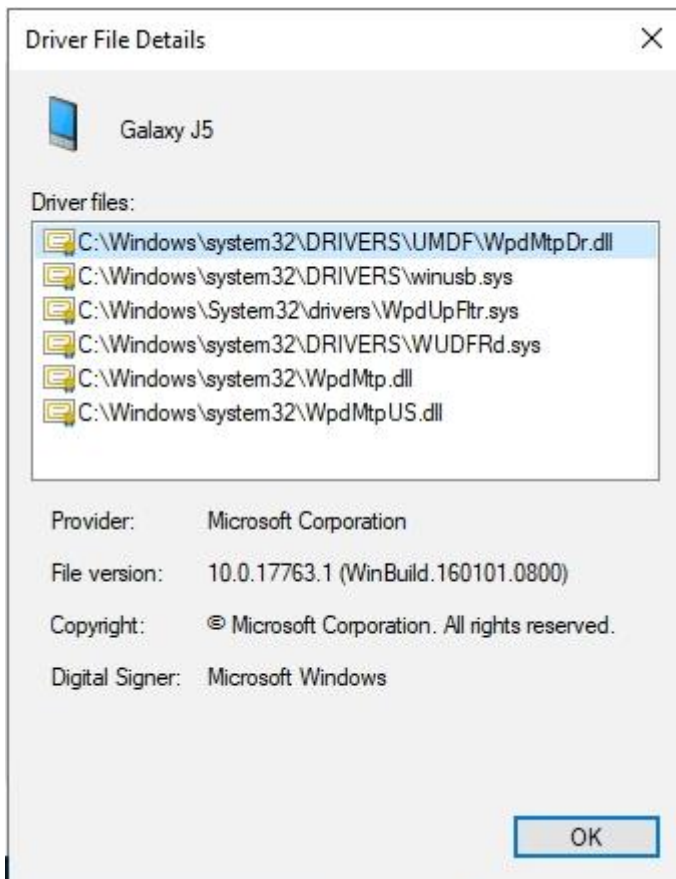

Galaxy J5 Properties

The screenshot shows the 'Galaxy J5 Properties' dialog box with the 'General' tab selected. It displays the device name 'Galaxy J5' and its properties: Device type: Portable Devices, Manufacturer: (Standard MTP Device), and Location: Location 1 (Port_#0000.Hub_#0025). The device status is reported as 'This device is working properly.'

Device type:	Portable Devices
Manufacturer:	(Standard MTP Device)
Location:	Location 1 (Port_#0000.Hub_#0025)

Device status
This device is working properly.

The screenshot shows the 'Driver File Details' dialog box for the Galaxy J5. It lists several driver files in the 'Driver files:' section and provides metadata such as the provider (Microsoft Corporation), file version (10.0.17763.1), copyright, and digital signer (Microsoft Windows).

Driver files:

- C:\Windows\system32\DRIVERS\UMDF\WpdMtpDr.dll
- C:\Windows\system32\DRIVERS\winusb.sys
- C:\Windows\System32\drivers\WpdUpFtr.sys
- C:\Windows\system32\DRIVERS\WUDFRd.sys
- C:\Windows\system32\WpdMtp.dll
- C:\Windows\system32\WpdMtpUS.dll

Provider: Microsoft Corporation
File version: 10.0.17763.1 (WinBuild.160101.0800)
Copyright: © Microsoft Corporation. All rights reserved.
Digital Signer: Microsoft Windows
