

Hello,

All VDI pool is setup with Windows 7 French version with Native french ISO, no language pack. So, all folder redirection is in native french naming

English Naming	French Naming
Documents	Mes Documents
Desktop	Bureau
Music	Ma Musique
Download	Téléchargements
Etc...	

Actually I use Persona Management for folder redirection and with Persona Management I need to specify for each folder redirection a full path of the redirection, see printscreen below

Persona Management folder redirection

I try to setup UEM to "reuse" previously redirected folders in french naming use in Persona Management, but I have a issues with UEM folder redirection. I can't specify a full path, UEM assumes everyone uses the English folder ???

UEM Folder redirection

CHUSJ-Production - Folder Redirection

Settings | Conditions | Comments

General Settings

Name: CHUSJ-Production|

Label:

Tag:

Folder Redirection Settings

Remote path: \\SJSJ01\usagers\%USERNAME% Browse...

Folders to redirect:

- Documents
- Downloads
- Music
- Pictures
- Videos

WARNING: Redirecting the following highly active profile folders might degrade filesystem and/or network performance.

- Desktop
- Favorites
- Programs Menu
- Roaming AppData

Use path: \\SJSJ01\usagers\%USERNAME%

Use path: Browse...

Save Cancel

The result is my user have a duplicated folder redirection

Mes Documents - Résultats de la recherche dans BRIMAR (\\...1\USAGERS) (U:)
