

VMware vCloud SDK for PHP 1.0.1 Release Notes

VMware vCloud SDK for PHP 1.0.1 | 16 FEB 2011 | Build 362508

Last updated: 16 FEB 2011

What's New

There are no new features in this release. This release can be used with both VMware vCloud Director 1.0 and 1.0.1.

Resolved Issues

This release of the VMware vCloud SDK for PHP resolves the following issues from the previous release:

API.php:

- Check optional element is set before iterating over it with foreach().

Factory.php:

- Fixed the URL-to-type mapping for creating vApp and vAppTemplate SDK objects.

VCloud.php:

- Renamed getTasksListRefs() to getTasksListRef() in class VMware_VCloud_SDK_Org.
- Changed return type of getVAppTemplateRefs() from LinkType to ReferenceType for the SDK API documentation.
- Changed HTTP response code from 202 to 204 for rebooting a VM or vApp operation.

Http/Client.php:

- Fixed "fwrite() expects parameter 2 to be string" error when invoking function getScreenThumbnailImage().
