

Bringup Report : VMware Inc, Fri Oct 11 08:05:09 UTC

2019

SDDC ID : vxrail09-workflowspec-vxrail

## Overall Summary

Bringup Status : COMPLETED\_WITH\_FAILURE

Total Number Of Tasks : 84

Number Of Successful Tasks : 8

Number Of Running Tasks : 0

Number Of Remaining Tasks : 75

Number Of Failed Tasks : 1

## Tasks Summary

## Successful Tasks

Task Name	Task Status
Import Cluster from VCenter	POSTVALIDATION_COMPLETED_WITH_SUCCESS
Import Hosts from VCenter	POSTVALIDATION_COMPLETED_WITH_SUCCESS
Import VMs from VCenter	POSTVALIDATION_COMPLETED_WITH_SUCCESS
Prepare NSXv Configuration	POSTVALIDATION_COMPLETED_WITH_SUCCESS
Prepare vRealize Log Insight Configuration	POSTVALIDATION_COMPLETED_WITH_SUCCESS
Migrate VMs to Management port group	POSTVALIDATION_COMPLETED_WITH_SUCCESS
Rename vCenter and PSC1 VMs	POSTVALIDATION_COMPLETED_WITH_SUCCESS
Reconfigure port groups	POSTVALIDATION_COMPLETED_WITH_SUCCESS

## Remaining Tasks

Task Name	Task Status
Apply vSAN DLF	INITIALIZED
Apply vSAN License	INITIALIZED
Apply ESXi Host License Key	INITIALIZED

ImportVxRailComponents- VersionData	INITIALIZED
Start SSH on vCenter	INITIALIZED
Start SSH on Platform Services Controller	INITIALIZED
DeployPsc2	INITIALIZED
CreateUserGroups	INITIALIZED
Deploy SDDC Manager	INITIALIZED
Configure Lifecycle Management Repository on SDDC Manager	INITIALIZED
Create NFS Datastore on Hosts	INITIALIZED
Configure Base Install Images Repository On SDDC Manager	INITIALIZED
StoreVxRailFeatureProper- tyAction	INITIALIZED
Install VMCA Root Certificate on SDDC Manager	INITIALIZED
Generate Install SDDC Manager VMCA Certificate Input	INITIALIZED
Install SDDC Manager VMCA Certificate	INITIALIZED
Post Inventory and Credentials	INITIALIZED
Post SDDC License Inventory	INITIALIZED
ProxyContractAction	INITIALIZED
Generate SDDC Manager input	INITIALIZED
Generate vSphere machine SSH entities input	INITIALIZED
Rotate machine SSH keys	INITIALIZED
Update known hosts on SDDC Manager	INITIALIZED
Deploy NSX Manager	INITIALIZED
Upload NSX Manager VMCA Certificate	INITIALIZED
Update NSX Manager TLS Settings	INITIALIZED

Register NSX Manager with vCenter Server	INITIALIZED
Apply NSX DLF	INITIALIZED
Apply NSX License	INITIALIZED
Generate NSX Manager Input Data	INITIALIZED
Configure NSX controller cluster DNS	INITIALIZED
Configure NSX controller cluster NTP	INITIALIZED
Create NSX Controller Cluster	INITIALIZED
Configure VXLAN Transport	INITIALIZED
Resolve NSX Cluster Issues	INITIALIZED
Create NSX Segment Range	INITIALIZED
Create NSX Multicast Range	INITIALIZED
Create NSX Transport Zone	INITIALIZED
Add VMs to NSX Distributed Firewall Exclusion List	INITIALIZED
Configure SSO on NSX Manager	INITIALIZED
Configure NSX Manager Backups	INITIALIZED
Generate input for Log Insight	INITIALIZED
Deploy vRealize Log Insight	INITIALIZED
Apply vRealize Log Insight License Action	INITIALIZED
Bootstrap vRealize Log Insight Cluster Action	INITIALIZED
Generate Certificate for vRealize Log Insight Action	INITIALIZED
Disable TLS 1.0 on vRealize Log Insight Nodes Action	INITIALIZED

Install vRealize Log Insight Content Packs Action	INITIALIZED
Generate NSX-V Log Insight Integration input	INITIALIZED
Configure Syslog on NSX Manager Action	INITIALIZED
Configure Syslog on NSX Controllers Action	INITIALIZED
Create VM Folders	INITIALIZED
Migrate VMs To Folders	INITIALIZED
Create Network Folders	INITIALIZED
Move vSphere Distributed Switch to Network Folder	INITIALIZED
Enable vSAN Storage Policies	INITIALIZED
Create Resource Pools in vCenter	INITIALIZED
Move VMs to Resource Pools	INITIALIZED
Set Reservations on Resource Pools	INITIALIZED
Create VM Anti-Affinity Rules	INITIALIZED
Create VM Groups	INITIALIZED
Create VM-VM Startup Order Rule	INITIALIZED
Create vCenter and PSC Host Group	INITIALIZED
Create PSC VM/Host Rule	INITIALIZED
Create vCenter VM/Host Rule	INITIALIZED
Clear Alarms on vSAN	INITIALIZED
Configure Deployment Details	INITIALIZED
Generate vSphere input	INITIALIZED
Disable bash shell on vCenter	INITIALIZED
Disable bash shell on PSCs	INITIALIZED
Update VMCA Certificate in VxRail Manager	INITIALIZED

Configure LogInsight as SysLog server for VxRail Manager	INITIALIZED
Generate input for Log Insight	INITIALIZED
Enable Log Collection for SDDC Manager Action	INITIALIZED
Configure Syslog Settings for vCenter Server	INITIALIZED

*Failed Tasks*

Task Name	Task Status	Error Message
Apply vCenter Server License	PREVALIDATION_COMPLETED_WITH_FAILURE	A problem has occurred on the server. Please retry or contact the service provider and provide the reference token.
